

SD BIOLINE Leishmania Ab

One Step Leishmania Antibody Test

Leishmaniasis is a vector-borne disease that is transmitted by sandflies and caused by obligate intracellular protozoa of the genus Leishmania. Leishmaniasis is found in parts of about 88 countries. Approximately 350 million people live in these areas. Most of the affected countries are in the tropics and subtropics. The settings in which leishmaniasis is found range from rain forests in Central and South America to deserts in West Asia. More than 90 percent of the world's cases of visceral leishmaniasis are in India, Bangladesh, Nepal, Sudan, and Brazil.

General Information

SD BIOLINE Leishmania Ab test is an one-step in vitro immunochromatographic assay designed for the qualitative determination of anti-Leishmania in human serum or plasma.

- Easy to use rapid test : All materials provided
- Specimen : Serum, plasma (20 µl)
- Test result : 10~15 minutes
- Shelf life and storage temperature: 24 months at 1-30 °C
- Performance: Sensitivity-98.0 %, Specificity-99.5 % (vs. Immuno-fluorescent method)

Materials Provided

- Test strip
- Assay diluent
- Capillary pipette (20 µl)
- Disposable test tube

Test Procedure

Ordering Information

Product	Cat. No.	Type	Specimen	Pack Size
Leishmania Ab	47FK12	Strip	Serum/Plasma	25T/Kit
