

PCR Kit for Avian disease

Indications

- Confirm poultry diseases by antigen detection
- Differential diagnosis of difficult case shows similar signs
- Apply to clarify signs of infection in vaccinated group shows uncertain antibody titer

Special Features

- Ultimate diagnostic system for poultry infectious disease
- Optimal & unique primers and probes system guarantees highly specific result
- BioNote general PCR Detection Kits contain all components for the detection of agents
- Includes positive and negative control
- More convenient method than virus culture
- One step PCR using Taqman probe (Real-Time)
- Enables quantitative and qualitative analysis (Real-Time)
- Higher detection limit than general PCR : 100~1,000 times more sensitive (Real-Time)

List of PCR Kit for Avian disease

	Product	Diagnosis	Cat. No.
General	AIV Detection Kit	AIV type A (Matrix gene)	PD55-01
	AIV H5 Detection Kit	Subtype H5	PD55-02
	Velo NDV Detection Kit	Velogenic Newcastle Disease virus	PD55-08
	IBDV Detection Kit	Infectious Bursal Disease virus	PD55-11
Real-time	AIV A Real-Time Detection Kit	AIV H5/N1 Duplex Detection Kit	PD65-01
	Velo NDV Real-Time Detection Kit	High pathogenic NDV virus (Velogenic)	PD65-08
	IBV Real-Time Detection Kit	Infectious Bronchitis Virus	PD65-09
	IBDV Real-Time Detection Kit	Infectious Bursal Disease Virus	PD65-11
	MYCO G/S Real-Time Detection Kit	Avian Mycoplasma gallisepticum, and M. iowae, M. meleagridis , M. synoviae	PD65-14
